What is Mocha ?

Mocha is a popular JavaScript testing framework that runs on Node.js and in the browser. It provides a flexible and feature-rich environment for writing and executing test cases, making it widely used for testing applications, including web applications. Mocha supports various testing styles, such as BDD (Behavior-Driven Development), TDD (Test-Driven Development), and traditional testing.

<https://mochajs.org>

Getting Started

```
npm install mocha
```

```
describe('TestSuite', function () {  
  it('Testcase', function () {  
    assert.equal("qacurry", "qacurry")  
  });  
});
```
