# Definition

**Test execution** is a crucial phase in the software testing process where the actual testing of the software application takes place.

During this phase, the tests that were planned and prepared in earlier stages are executed on the software to

- identify defects,
- verify functionality,
- and validate that the application meets the specified requirements.

# Where does it fit ?

# Together, Lets Execute a Test

Testcase ID	Module	Testcase Description	Priority	Test Steps	Expected Result	Actual Result	Status
1	Login	On Providing valid credentials, User should beloggedin to the BookStore Application	P1	Step 1	Open <a href="https://bookstore.qacurry.com">https://bookstore.qacurry.com</a> on any Browser		
				Step 2	Enter username - student@qacurry.com		
				Step 3	Enter Password - *****		
				Step 4	Click on Login Button
